

HOW THEY DID IT:

They used a particular bug (Coronavirus) that was previously relatively benign and nonpathogenic and modified it through the use of gene editing techniques to make the bug (Covid-19) virulent, pathogenic, dangerous and then released that bug (Covid) in key sites.

They went one step further, they created small controllable robotic units at the nano scale that can be aerosolized to create a nano swarm. It is a bio penetrable material that you cannot see and that is able to integrate itself through a variety of membranes such as the mouth, nose, ears and eyes.

Once it enters these membranes it can then be taken up into the vascular system to create clumping. It can also affect the vascular system of the brain or it can directly be diffused into the brain space and be weaponized. This can be done at such a level that their presence is almost impossible to detect.

The delivery system was the Covid Vaccines that they injected into billions of people to kill and to control the populations around the world.
